HOW TO USE

DO NOT spray eco-oil in temperatures exceeding 35°C.
DO NOT spray directly on to sensitive flower heads, apply to foliage only to prevent oil spotting.
DO NOT apply to plants suffering from heat or moisture stress.

PLANTS	PESTS	RATE	HOW TO APPLY
Tomatoes, cucumbers, capsicums, strawberries and ornamental plants	Two-spotted mite, Aphids	Mix 5 mL of product to 1 L of water	Spray when pests first appear. Apply two sprays 3 to 5 days apart. Repeat applications at signs of reinfestation. Spray both upper and underside of leaves to run-off. DO NOT apply more than three sprays to plants within a 4 to 8 week period.
Vegetables and ornamental plants	Greenhouse Whitefly		
Olive trees	Black scale	10 mL of product to 1 L of water	Apply at early signs of Scale. Apply two sprays at 7 day intervals. Repeat applications at signs of reinfestation. Spray upper and underside of leaves and branches to run-off.
Citrus	Citrus leafminer	10 mL of product to 1 L of water	Begin applying when new flush growth is about 4cm long. Apply every 5 to 14 days with presence of new flush growth. Ensure that the new flush leaves are sprayed both on top and underneath. Do not apply any more than 8 times per season.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED.
WITHHOLDING PERIOD: Not required when used as directed.

HOW TO PREPARE:

eco-oil is a botanical oil based miticide/insecticide that controls pests by contact. As such complete coverage of plants is important. For best results spray with eco-oil at the first sign of pest infestation. Repeat application may be necessary. Some plant species (like maidenhair ferns) are more sensitive than others so it is recommended that a pre-test be conducted on a small area of foliage before using.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131 126.

LIABILITY: This product must only be used as directed. OCP will not be liable for any loss or damage due to a failure to strictly follow label directions.

HOW TO MIX:

1. Half fill the spray container with clean water.
2. Add the required amount of eco-oil, shake, then top up container with water and shake again.

Frequent agitation (shaking) of the spray solution is recommended during application.

CAUTION: DO NOT allow chemical containers or spray to get into drains, sewers, streams or ponds.

STORAGE AND DISPOSAL: Store in the closed, original container in a cool, dry place out of reach of children. Do not store in direct sunlight. Dispose of empty container by wrapping in paper, placing in plastic bag and putting in garbage.
